Summary

Data-focused professional with a strong foundation in Python, SQL, Power BI, and Microsoft Excel, developed through academic work at ISET and hands-on personal projects. Passionate about data engineering, analytics workflows, and solving real-world problems with data. Currently deepening expertise in ETL pipelines, data modeling, and business intelligence tools.

Education

International School of Economics (ISET)

Economics and Data Science | Sep 2022 – Present

Experience

Data Analytics Engineering Trainee — EMAP Georgia

Training Role | Georgia

- Developed foundational skills in data processing, data modeling, and analytics workflows through guided exercises and mentorship.
- Worked with sample and internal datasets to practice data cleaning, transformation, and basic exploratory analysis.
- Gained hands-on exposure to SQL querying, ETL concepts, and data visualization tools.
- Observed how data pipelines and reporting processes are implemented in a production environment.

Projects

Uber Trips ETL Pipeline & Analysis · Dec 2025 – Jan 2026

ETL pipeline using dbt and Snowflake to transform raw Uber trip data into a structured format for analysis.

Stack: Python, SQL, dbt, Snowflake

[github.com/LukaJikhvashvili/Uber-Trips-ETL-Pipeline-and-Analysis](#)

Data Jobs Dashboards

Interactive Power BI dashboard showcasing job trends, salaries, and in-demand skills across data roles in the US, built from real job postings.

Stack: Power BI, KPI, Power Query, DAX

[github.com/LukaJikhvashvili/Data-Jobs-Dashboards](#)

Data Jobs Analysis

Python-based analysis identifying the top-paying and most in-demand skills for data analysts, built to help navigate the job market effectively.

Stack: Python, Pandas, Seaborn

[github.com/LukaJikhvashvili/Data-Jobs-Analysis](#)

Sales Analysis

PostgreSQL-powered analysis of customer behavior, retention, and lifetime value for an e-commerce company to improve retention and maximize revenue.

Stack: PostgreSQL, Sales Analysis

[github.com/LukaJikhvashvili/Contoso-Sales-Analysis](#)

Skills

Data & BI	Power BI (Power Query, DAX, KPI), Microsoft Excel
Languages	Python (Pandas, Seaborn), SQL (PostgreSQL)
Engineering	dbt, Snowflake, ETL Pipelines, Data Modeling
Practices	Exploratory Analysis, Data Cleaning, Data Visualization

Languages

Georgian	Native
English	B2–C1
